

Hunger and violent conflict

Pathways

The production of food

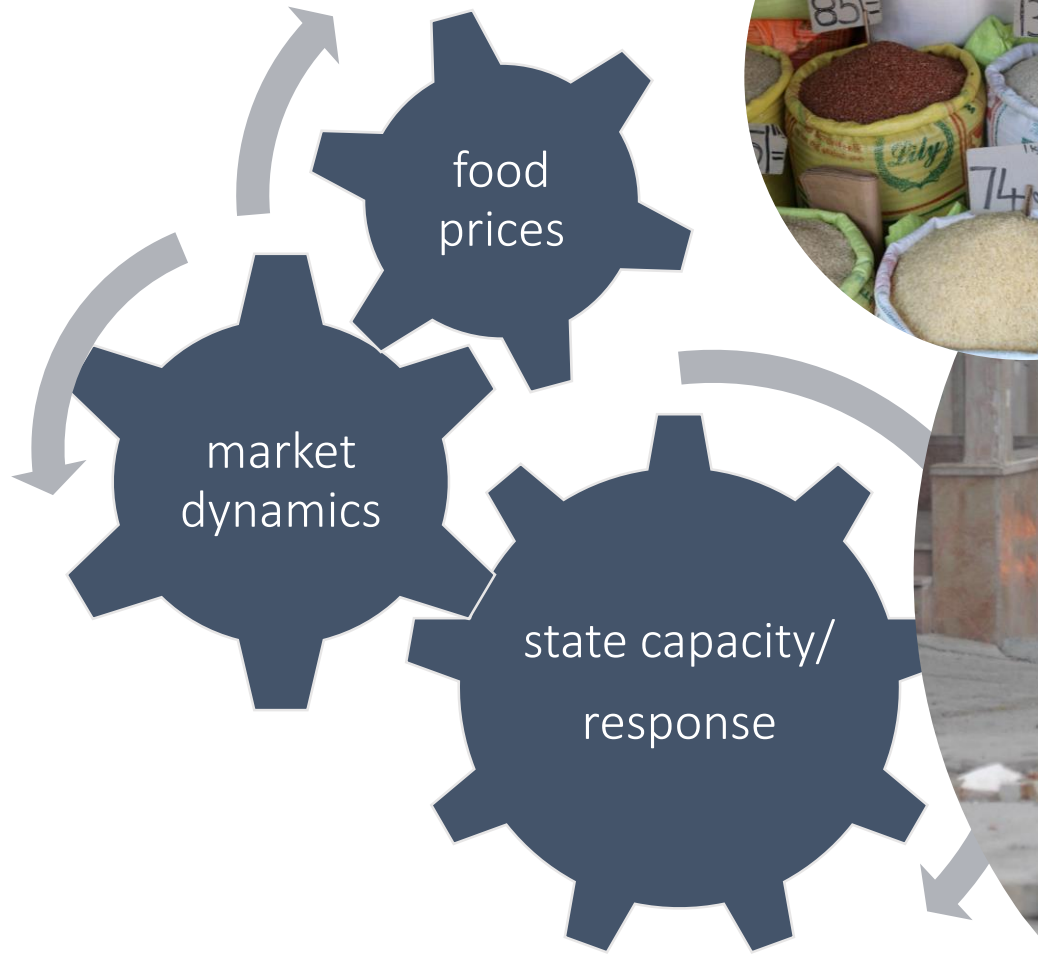

- a) destruction of assets and resource
- b) controlling production
- c) destruction of human capital
- d) increased risk and diversion of resources in the wider operating environment

The distribution and functioning of markets

- a) disrupt market links
- b) reduce availability of food
- c) shift market dynamics
- d) change market institutional environment

Food prices

Climate change and environmental stress

Transformative food systems

Transformative food systems interventions can play a crucial role in strengthening social cohesion in fragile states by addressing underlying causes of conflict, promoting inclusive participation, and fostering sustainable development.
